Actual Power/ Mark Power- LED Luminous Effect-LED LED Lighting Shape-LED Lighting Angle	1:1 130-140 Lm/W Rectangular without extra lens- 150 degrees-150°,	
LED lamp life	12 years-	
Controller	Basic functions+ Save another 80% power	
Anti-Days without Sunshine Battery	30 days- Waterproof with Nano technology-	
Battery Installation	Buried under intergeliosol	
Battery Life	5- 8 years	
Cabels	Anti-UV Silicone Rubber Purple copper wire.very low resistance	
100% working throughout 365 days in a year	Yes-	
Human-Friendly Installation	5-7 sets of the water-proof joints, easy for connection and installation-	
The overall performance	Excellent	

Let's assume the whole cost of the solar street light 100%, in 10 years, our cost is only 100%, the others 300%=100% (the first cost of the solar street light), the details will be as following:
+5*20% (battery cost is about 20% of the whole solar street light, their life is only 2 years, so they need to
+45% LED lamp cost (their LED lamp light decay is 20% in 1 year, so in 10 years, their LED lamp has to
60%-20%*3=60%), the LED lamp brightness will be very low,), the LED lamp cost is about 15% of the wh
+55% (it is the labor cost of replacing the above 2 components, especially the labor cost to replace the ba
And, our solar street lights can be 100% lighting throughout the whole year, it can work through 25-30 day
solar street light, which can build your company a very good reputation, and can bright more business for
